Printing Preparation Teacher Notes to write on board.

First Steps

- Draw up a ‘master copy’ of your print design – in ‘actual size’. You will use this master copy to trace off all the different layers of your design.
- Good idea to trace around your T.shirt onto newsprint so you can see the physical ‘real’ size.
- Work out how many different templates you need for your print.
- You need a different template for each colour and each layer of your design.
- Draw a mini sketch of each separate template layer and label it – silk screen template or photographic template.

- Fill in the first 6 criteria on the Completed T.Shirt self / peer assessment checklist.
- Computer use list on board – 5 mins per student
